Received: 14 February 2014 / Accepted: 20 February 2014 / Published: 24 February 2014

The suitability of high resolution satellite imagery to provide the water status in orchard crops, i.e. stem water potential (Ψ_{stem}) was evaluated in [1]. However, the contribution of a number of collaborators was not properly acknowledged. Pieter Janssens, Wendy Odeurs, Hilde Vandendriessche and Tom Deckers all provided a substantial contribution to the conception and the design of the work. They furthermore had a leading role in the acquisition, processing, analysis, and interpretation of the reference evapotranspiration (ET_o) and Ψ_{stem} data. The article [1] would not have been possible without their valuable input, and the authors would like to correct the authors list as follows:

Jonathan Van Beek^{1,*}, **Laurent Tits**¹, **Ben Somers**², **Pieter Janssens**³, **Wendy Odeurs**³, **Hilde Vandendriessche**^{3,4}, **Tom Deckers**⁵ and **Pol Coppin**¹

¹ KU Leuven, Department of Biosystems, M3-BIORES, Willem de Croylaan 34, Leuven BE-3001, Belgium; E-Mails: laurent.tits@biw.kuleuven.be (L.T.); pol.coppin@biw.kuleuven.be (P.C.)
